**PROCESSES
FILTERS**

Hilco offers a full line of process filter vessels for the treatment of amines, glycols, fuels, liquefied natural gases (LNGs), and gaseous fuels as well. As standard, Hilco process filter vessels are built to ASME Code Section VII, Division 1 with optional 97/23/EC PED construction available as well. All process filter vessels incorporate Hilco's high performance process filter elements. Hilco process filter elements incorporate a proprietary blend of fibers which give a much better filter predictability and fiber stability with varying degrees of moisture contents. As a result, Hilco process filter elements have exceptionally high dirt holding capacities which significantly extend online service life or run time.

Process Filters

HILCO offers a full line of process filter vessels for the treatment of amines, glycols, fuels, liquefied natural gases (LNGs), and gaseous fuels as well. As standard, HILCO process filter vessels are built to ASME Code Section VII, Division 1 with optional 2014/68/EU PED construction available as well. All process filter vessels incorporate HILCO's high performance process filter elements. HILCO process filter elements incorporate a proprietary blend of fibers which give a much better filter predictability and fiber stability with varying degrees of moisture contents. As a result, HILCO process filter elements have exceptionally high dirt holding capacities which significantly extend online service life or run time.

Applications

Marine/Shipping - Mining - Oil & Gas - Pulp & Paper - Steel
